

## Case Study – Asbestos Surveys Manchester United FC

Project Title	Ad Hoc Asbestos Refurbishment Surveys
Location	Various Locations Manchester
Client	MUFC
Project Value	£1,000.00 - £10,000.00 Annually
Project Commencement	March 2010
Project Completion	Ongoing
Project Description	Undertake ad-hoc asbestos refurbishment surveys in line with planned refurbishments to stadia, training venues and associated sites.
Challenges	Working for one of the World's largest sporting brands across a diverse and expansive property portfolio.

Winsulate have been providing ad-hoc asbestos survey and abatement works to Manchester United Football Club since 2010. During this period, we have undertaken survey and management works to Old Trafford Stadium, the Carrington Training Facility and associated property in and around the Old Trafford and South Manchester areas.

Winsulate provide a range of asbestos surveys to MUFC including, management surveys to various buildings and venues, targeted refurbishment surveys in line with anticipated facility improvements, bulk sample testing to specific site areas and associated analytical works. We have also provided various schemes of planned and controlled abatement works across the stock.

Winsulate are proud to support such an historic sporting institution and our professionalism, efficiency and confidentiality are key to maintaining such enviable client relationships.
